Subject: Combined Summary of Week #4 and 5 Trigger Level Exceedances

Dennis -

Here's the summary of the week 4 and 5 exceedances. As a reminder: 9 locations were sampled week #4 (February 13 - 15); 4 locations were sampled week #5 (March 6 - 8).

Week #4

I added a bit more detail to week #4 with respect to water usage, but no real changes from what I sent last week. All the week 4 data is final. We received a couple minor comments on the week 4 data from HQs EU and WPD. Have drafted an initial response and forward to Fort Meade for input.

Week #5

We are still working to finalize the week 5 data. As part of the project review, our contractor provided comments on the the lab reports from R3 and R6. Cindy has responded to comments on the R3 data. She is following up on the R6 comments. To make the deadline for rollout - I asked that Cindy provide responses no later than COB next tomorrow Tuesday April 24th. Once we have the final qualifiers in Scribe - we will run the draft tox reports and residential reports for review by R3 tox, WPD, ATSDR and HQs. To make the deadline for roll-out - we really need to get these reports to HQs no later then Wed April 25th.

FYI--- We have the tox memos for week #4. Once we have week #5 - will provide all to HQs EU.

Let me know if you have any questions.

Thanks - Kelley
